Profile

DevOps engineer with experience building and automating production infrastructure. Skilled in Linux environments, containerization with Docker, CI/CD pipelines on GitHub Actions, and cloud-native deployment workflows. Focused on infrastructure automation, system security, and building reliable, scalable deployment processes that bridge development and operations. Combines a strong software engineering background with hands-on infrastructure management and AI-augmented tooling.

Technical Skills

- **CI/CD & Automation:** GitHub Actions, CI/CD Pipelines, Automated Deployments, Process Automation, Git
- **Containers & Virtualization:** Docker, Docker Compose, Linux, Vercel, Netlify
- **Cloud & Infrastructure:** AWS, Azure, Supabase, Microservices, GraphQL
- **Scripting & Programming:** Node.js, Python, Bash, TypeScript, REST APIs
- **Databases & Data:** PostgreSQL, MongoDB, Supabase, MySQL, SQL Server
- **Security & Compliance:** JWT, Bcrypt, OWASP Standards, Row Level Security, Data Privacy
- **Monitoring & Observability:** Performance Optimization (3.2x TTI), Audit Engines, Validation Logic
- **Methodologies:** SDD (Spec-Driven Development), Agile, Scrum, Kanban, XP, Design Thinking
- **Tools & OS:** Git, GitHub, Linux, Claude Code, OpenCode, MCP, Figma, JUnit, Jest, Cypress
- **Familiar with:** .NET, Kotlin, Firebase, Kafka, Java, Spring Boot, Angular, React

Professional Experience

- **Seven D Construction** Jan 2026 - Jul 2026
Software Engineer · Project-based Contract (Remote) Chicago, IL, USA / Mexico
 - Led the evolution of **7D-Compass**, automating payment reconciliation via CI/CD workflows and reducing operational time by **95%**.
 - Implemented a centralized audit engine reconciling **\$5.5M USD** in transactions through automated validation logic and infrastructure monitoring.
 - Containerized the application stack using **Docker** and **Docker Compose**, streamlining deployments across environments.
 - Optimized system security with **JWT/Bcrypt** following **OWASP** standards and improved frontend delivery performance by **3.2x**.
- **PepsiCo** May 2024 - Aug 2024
Software Developer · Project-based Contract (Remote) Azcapotzalco, CDMX, Mexico
 - Automated processing of **+100k records** replacing legacy Excel workflows with a centralized web application, eliminating manual errors.
 - Optimized backend processing time by 70% through efficient data pipelines and infrastructure configuration.
- **Flack's Barber Shop** Oct 2022 - Apr 2024
Software Developer · Project-based Contract Córdoba, Veracruz, Mexico
 - Designed and deployed a full digital ecosystem (Web + Mobile) backed by a **REST API** with Java Spring Boot and PostgreSQL.
 - Architected the infrastructure for centralized inventory, sales, and appointment management serving multiple client platforms.
- **Coppel (Genius Arena Hackathon — Talent Land 2025)** Apr 2025
4th Place & Team Lead Guadalajara, Jalisco, Mexico
 - Built the infrastructure for **Coppel Nexus**, a gamified referral ecosystem (React Native/Node.js) during a 72-hour sprint.
 - Managed CI/CD pipelines and deployment workflows as Team Lead, coordinating multi-platform releases.
- **Banco Azteca (Genius Arena Hackathon — Talent Land 2026)** Apr 2026
Participant & Team Lead Santa Fe, CDMX, Mexico
 - Led development of **Azkali's** infrastructure, integrating **Supabase** for real-time storage with **Row Level Security**.
 - Orchestrated Gemini AI logic with cloud database infrastructure during a 48-hour sprint.

Featured Projects

- **7D-Compass**
Node.js, PostgreSQL, Docker, Angular, CI/CD
 - Infrastructure for payment reconciliation and operational management in construction.
 - Dockerized stack with automated CI/CD pipelines reducing operational time by 95%.
 - Centralized audit engine with validation infrastructure for financial transactions.
- **IAPEX (Encuéntrame)**
Spring Boot, PostgreSQL, Angular, Ionic, Python, Docker
 - Hybrid AI ecosystem for locating missing patients in healthcare institutions.
 - Designed infrastructure under strict privacy protocols and medical data security standards.
 - Deployed multi-service architecture integrating facial recognition and text search.
- **dabetai**
Python, React Native, NestJS, Wearables, Docker
 - Preventive diabetes platform connecting wearables with medical supervision.
 - Infrastructure for real-time risk prediction algorithms and automated alert delivery.
 - Reduced physician-patient response time by 40% through automated notification pipelines.
